

Stay Connected:

Tips for using Zoom for telehealth visits

UF Health has made telehealth appointments available to our patients for some visits. Contact your provider for an appointment and they will determine if a telehealth visit is right for you. If you have a scheduled telehealth appointment, follow the instructions below to prepare for and connect to your visit.

STEP
1

Before your scheduled visit, you will need to download Zoom for Cloud Meetings. You can access this through the app store on your phone. It is not required to create an account.

STEP
2

Prior to your appointment, you will receive an email from our clinical support team or your care provider. The email will contain the Zoom hyperlink you will use for your telehealth visit or a "meeting ID."

STEP
3

Open Zoom 15 minutes before your scheduled appointment by using the link in the email from your provider or manually by clicking the icon on your device.

STEP
4

Click Join a Meeting, type in your meeting ID, and click Join.

STEP
5

Wait for the physician in the virtual waiting room. This may take a few minutes so please be patient.

Please review our Telehealth Consent and Authorization information prior to your appointment. Visit UFHealth.org/telehealth for more information and tips to get the best experience during your telehealth visit.
